

2019 Packaging

www.brannan.co.uk

S.Brannan & Sons recognises that its activities, products and services have an environmental impact at all stages of the product life cycle. As such, we are committed to making continual reductions in our impact on the environment by minimising all waste materials from production.

With this in mind; we are pleased to announce the introduction of a new and improved sustainable packaging solution for our products. The new packaging will be 100% recyclable and by completing the switch we will remove all single-use plastic from our packaging.

We are looking to complete the transition to the new packaging, as well as gaining certification to 'ISO 14001:2015 Environmental Management Systems' by October 2019.

We continue to be able to provide a bespoke service for customer own branded packaging. (MOQ apply). Please contact our Sales Team for further details.

Individually packaged Laboratory Thermometers

Previously, laboratory thermometers were packed in single use plastic packaging, in box of ten thermometers. This has now been updated to reusable, telescopic cases.

BRN S291164:19:R0

Please note: all information correct at the time of printing, but our policy is one of continuous product development. We reserve the right to change specification without notice.
