REPLACEMENT POCKETS FOR THERMOMETERS

Use of Thermometer Pockets

Standard pockets, nominal length up to and including 100mm, are suitable for working pressure up to 40 bar. Pockets exceeding 100mm nominal length will normally be fabricated and are only suitable for working pressure of up to 25 bar. Thermometers are normally supplied complete with pockets and should not be installed on a pressurised system without suitable pocket.

Product features

- Available in brass or stainless steel 304
- To suit stem lengths 50mm, 100mm or 150mm

Applications

- Heating, ventilation, air-conditioning
- Hot water
- Industrial
