LIGHT & MOISTURE METER + pH METER WITH CABLED PROBES

Twin pack of Light and moisture meter with pH meter.

The light and moisture meter tests both for moisture content in soil or compost and for the light falling onto a plant and is supplied complete with guide to light and watering requirements of plants.

The pH meter instantly shows how acid or alkaline the soil is and checks which plants suit and includes a plant care booklet listing over 400 pH levels.

Product features:

- Selectable light or moisture measurement
- Instant pH measurement
- Ideal for horticultural and all soil studies in the field
- Strong plastic case
- Simple operation
- No batteries required
- Operating instructions included

Product specifications:

Accuracy:

These meters are designed for amateur garden use and are ideal to give a guide to soil conditions. The accuracy of the reading is dependant on the method of use and it is therefore important that the instructions are followed carefully.

Please also note, soil conditions can vary considerably over relatively small areas, so multiple readings should be taken to get the best results.

Please consult the product instructions on how to get the best results from your meter and what types of soil different plants require.
