STANDARD ECOLOGY & WEATHER KIT

The Brannan ecology and weather kits provide a selection of weather watcher equipment in a sturdy carry case.

To ensure that meteorological observations are made under the best and most consistent conditions, instruments for outdoor use should be grouped together on a carefully selected site enclosed by open fencing or palings to exclude unauthorised persons or animals. The plot chosen should be on generally level ground covered with short grass and must not be in a hollow or near a steep slope and the site should be well away from trees, bushes, walls or buildings or any other possible obstruction.

Those seeking more detailed information about weather recording are recommended to obtain "The Meteorological Observers' Handbook", from H.M. Stationery Office.

Product features:

- Selection of weather watcher equipment
- Complete with weather register to record measurements
- Supplied in robust carry case with full operating instructions
