S. Brannan and Sons operate an ISO9001 certified Quality Management System in order to ensure the accuracy and reliability of every instrument we produce.
The readings were determined by comparison with traceable standard instruments, the reference numbers of which are shown above.
We recommend that periodic recalibration should be carried out on the instrument yearly, but the recalibration frequency is best determined by the user depending upon the frequency and conditions of use, as well as the level of accuracy required by the process.
