Measurement for life.

DATA CENTRE INSTRUMENTATION

*Designed for the demands of modern data
centre infrastructure*

In mission-critical environments, accurate pressure monitoring is essential for maintaining system performance, protecting equipment, and supporting operational resilience.

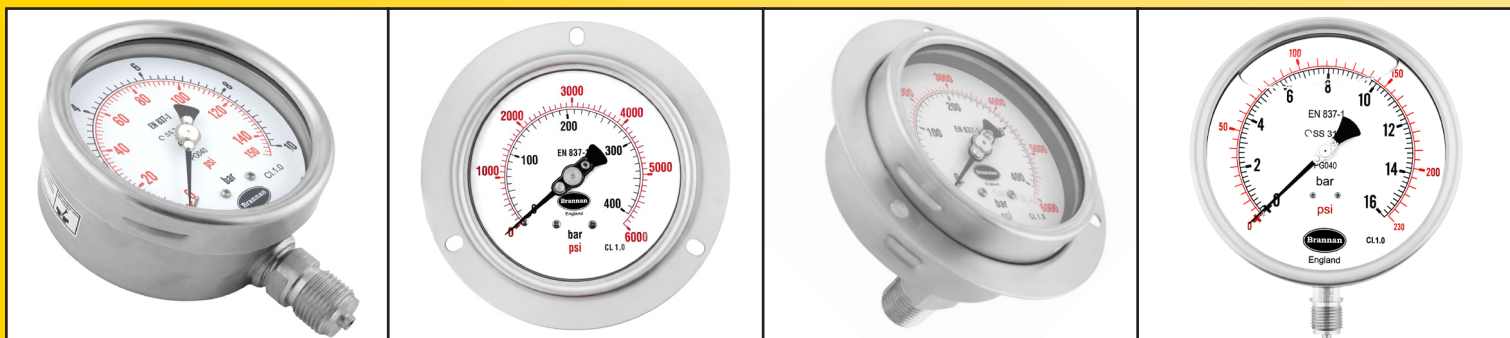

Brannan's comprehensive range of pressure gauges has been selected to meet the requirements of today's data centre mechanical services, including:

- Chilled water systems
- LTHW and CHW pipework
- HVAC plant
- Pump and filtration systems
- Heat exchangers and ancillary equipment

Available in a wide range of sizes, pressure ranges, connection types, and materials, our gauges provide dependable, long-term performance for both new-build and retrofit projects.

Whether you're a consultant, M&E contractor, or facilities specialist, we're here to help you specify the right pressure monitoring solution for your application.

Contact our team to discuss your project requirements.

Choose Brannan for:

✓ Reliability

✓ Accuracy

✓ Technical support

✓ 5 year guarantee
